EXPLANATION OF SYMBOLS

The following are the only symbols used for the purposes indicated below:

- (C) – Indicates changed regulation.
- (D) – Indicates discontinued rate or regulation.
- (I) – Indicates rate increase.
- (M) – Indicates a move in the location of text.
- (N) – Indicates a new rate or regulation.
- (R) – Indicates a rate reduction.
- (T) – Indicates a change in text only.

TARIFF FORMAT

A. Leaf Numbering - Leaf numbers appear in the upper right corner of the page. Leaves are numbered sequentially. However, new leaves are occasionally added to the tariff. When a new leaf is added between leaves already in effect, a decimal is added. For example, a new leaf added between leaves 14 and 15 would be 14.1.

B. Leaf Revision Numbers – Revision numbers also appear in the upper right corner of each page. These are used to determine the most current leaf version on file with the P.S.C. For example, the 4th revised Leaf 14 cancels the 3rd revised Leaf 14. Because of various suspension periods, deferrals, etc. the P.S.C. follows in their tariff approval process, the most current leaf number on file with the P.S.C. is not always the tariff page in effect.

C. Paragraph Numbering Sequence – There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1
- 2.1.1
- 2.1.1.A
- 2.1.1.A.1
- 2.1.1.A.1.(a)
- 2.1.1.A.1.(a).I
- 2.1.1.A.1.(a).I.(i)
- 2.1.1.A.1.(a).I.(i).(1)

In addition, the optional features and any extraordinary installation costs other than recurring and non-recurring charges may apply as described herein. Customers may subscribe to services on a one, two or three year term agreement. The customer must pay the regular tariffed rate for the service they subscribe to for the minimum period of service. If a customer disconnects service before the end of the minimum service period, that customer is responsible for paying the regular rates for the remainder of the minimum service period. When the service is moved within the same building, to another building on the same premises, or to a different premises entirely, the period of service at each location is accumulated to calculate if the customer has met the minimum period of service obligation. C

If service is terminated before the end of the minimum period of service as a result of condemnation of property, damage to property requiring the premises to be abandoned, or by the death of the customer, the customer is not obligated to pay for service for the remainder of the minimum period.

If service is switched over to a new customer at the same premises or alternate location after the first month's service, the minimum period of service requirements are assigned to the new customer if the new customer agrees in writing to accept them. For facilities not taken over by the new customer, the original customer is responsible for the remaining payment for the minimum service period in accordance with the terms under which the service was originally furnished.

The Company may offer services which require a minimum monthly fee ("MMF") wherein the Subscriber agrees, in writing, to pay the minimum amount per period agreed to upon commencement of service. Subscribers falling below their MMF will be billed for the difference between the contracted MMF and what was actually billed during the month pursuant to the MMF agreement. Should the subscriber choose to terminate their C

contract prior to expiration of the term agreed to in the MMF agreement, the Subscriber will be liable for the minimum usage requirements contained in the contract multiplied by the number of months remaining in the term, If a subscriber terminates business switched or dedicated services to include private branch exchange trunk service and PRI T-1 or comparable services, in whole or in part, before the expiration of the contract period, the subscriber shall pay to the Company an early termination charge for each disconnected service(s) or feature(s) equal to the applicable monthly rate charged by the Company for the service(s) or feature(s) multiplied by the number of months remaining in the contract term.

A credit allowance will be made when an interruption occurs because of a failure of any component furnished by the Company under this Tariff.

2.11.1 Credit for Interruptions

- A. An interruption period begins when the Customer reports a service, facility, or circuit to be interrupted and releases it for testing and repair. An interruption period ends when the service, facility, or circuit is operative. If the Customer reports a service, facility, or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted. C
- B. For calculating credit allowances, every month is considered to have 30 days. A credit allowance is applied on a pro rata basis against the rates specified hereunder and is dependent upon the length of the interruption. Only those facilities on the interrupted portion of the circuit will receive a credit. C
- C. A credit allowance will be given, upon request of the customer to the business office, for interruptions of 24 hours or more. Credit allowances will be calculated as follows: C
 - 1. if interruption continues for 24 hours:

Two or more interruptions during any one 24-hour period shall be considered as one interruption.

3. Credit to Customer

Credits attributable to any billing period for interruptions of service shall not exceed the total charges for that period for the service and facilities furnished by the Company rendered useless or substantially impaired.

4. "Interruption" Defined

For the purpose of applying this provision, the word "interruption" shall mean the inability to complete calls either incoming or outgoing or both due to equipment malfunction or human errors. "Interruption" does not include and no allowance shall be given for service difficulties such as slow dial tone, circuits busy or other network and/or switching capacity shortages. Nor shall the interruption allowance apply where service is interrupted by the negligence or willful act of the subscriber or where the Company, pursuant to the terms of the Tariff, suspends or terminates service because of nonpayment of bills due to the company, unlawful or

Section 2 – GENERAL RULES AND REGULATIONS (cont'd)

improper use of the facilities or service, or any other reason covered by the Tariff. No allowance shall be made for interruptions due to electric power failure where, by the provisions of this Tariff, the subscriber is responsible for providing electric power.

2.11.2 Limitations on Credit Allowances

No credit allowance will be made for:

- A. interruptions due to the negligence of, or non-compliance with the provisions of this Tariff, by any party other than the Company, including but not limited to the customer, authorized user, or other common carriers connected to, or providing service connected to, the service of the Company or facilities used by the Company;

- B. The ANI recipient or its designated billing agent is prohibited from utilizing ANI information to establish marketing lists or to conduct outgoing marketing calls, except as permitted by the preceding paragraph, unless the ANI recipient obtains the prior written consent of the telephone subscriber permitting the use of ANI information for such purposes. The foregoing provisions notwithstanding, no ANI recipient or its designated billing agent may utilize ANI information if prohibited elsewhere by law.
- C. The ANI recipient or its designated billing agent is prohibited from reselling, or otherwise disclosing ANI information to any other third party for any use other than those listed in Provision 1, unless the ANI recipient

If the Commission determines that there have been three or more separate violations in a 24 month period, delivery of ANI to the offending party shall be terminated under terms and conditions determined by the Commission.

C

Section 2 – GENERAL RULES AND REGULATIONS (cont'd)

2.13 EMERGENCY/ CRISIS/ DISASTER RESTORATION AND PROVISIONING
TELECOMMUNICATIONS SERVICE PRIORITY

2.13.1 General

- A. The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions. Under the rules of the TSP System, the Company is authorized and required to provide and restore services with TSP assignments before services without such assignments. **T**

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.

Section 2 – GENERAL RULES AND REGULATIONS (cont'd)

B. The TSP program has two components, restoration and provisioning. **C**

1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services. **T**

2.13.2 TSP Request Process:

2.13.2.A TSP Request Process – Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

1. determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.
 - a. National Security Leadership
 - b. National Security Posture and U.S. Population Attack Warning
 - c. Public Health, Safety, and Maintenance of Law and Order
 - d. Public Welfare and Maintenance of National Economic Posture

Section 2 – GENERAL RULES AND REGULATIONS (cont'd)

2. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual. C
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service, order to the Company requesting restoration of NS/EP services.

2.13.2.B TSP Request Process - Provisioning

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2.10.1.a. above for restoration priority assignment except for the following differences. The user should:

1. Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2a(a) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.

Section 2 – GENERAL RULES AND REGULATIONS (cont'd)

2. Verify that the Company cannot meet the service due date without a TSP assignment.
3. Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

2.13.3 Responsibilities of the End-User

End-users or entities acting on their behalf must perform the following:

- A. Identify telecommunications services requiring priority.
- B. Request, justify, and re-validate all priority level assignments. Validation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).
- C. Accept TSP services by the service due dates.
- D. Have Customer Premises Equipment (CPE) and Customer Premises Wiring (CPW) available by the requested service due date and ensure (through contractual means or otherwise) priority treatment for CPE and CPW necessary for end-to-end service continuity.
- E. Pay the Company any authorized costs associated with priority services.
- F. Report to the Company any failed or unusable services with priority levels.
- G. Designate a 24-hour point of contact for each TSP request and apprise the OPT.

C

Section 2 – GENERAL RULES AND REGULATIONS (cont'd)

- H. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and re-validation.

C
|

2.13.4 Responsibilities of the Company

The Company will perform the following:

- A. Provide TSP service only after receipt of a TSP authorization code.
- B. Revoke TSP services at the direction of the end-user or OPT.
- C. Ensure that TSP Program priorities supersede any other telecommunications priority that may be provided (other than control service and order wires).
- D. Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.
- E. Designate a 24-hour point of contact to coordinate TSP processes with the OPT.
- F. Confirm completion of TSP service order activity to the OPT.
- G. Participate in reconciliation of TSP information at the request of the OPT.
- H. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor.
- I. Ensure that other carriers supplying underlying facilities are provided information necessary to implement priority treatment of facilities that support NS/EP services.

Such carriers will maintain the data and establish appropriate methods of identification and authentication to secure the data and restrict access by each customer to information relative to that customer's qualifying circuits. Company will obtain data from facilities-based carriers it subscribes to.
- B. Customers that subscribe to the Critical Facilities Administration ("CFA") Service will be provided with information about the physical path of their Qualified Circuits by a Company Representative, upon the written request of the customer and subject to applicable Company security and confidentiality safeguards and procedures. All Subscribing Circuits must be enrolled in the Federal Telecommunications Service Priority ("TSP") program.

Connection Charges are listed with each service to which they apply.

3.1.1 Service Call and Premises Visit Charges

All expedite requests are handled on a "best efforts" basis and rely on the cooperation of and accommodation by external service providers. Expedite fees are incurred as a result of initiating the request and are therefore not refundable even if the expedite is unsuccessful.

3.1.2 Exceptions to the Charge

SECTION 4 - INTRALATA TOLL USAGE

4.1 General

4.1.1 Description

IntraLATA toll service is furnished for communication between telephones in different local calling areas within a particular LATA in accordance with the regulations and schedules of charges specified in this tariff. The toll service charges specified in this section are in payment for all service furnished between the calling and called telephone, except as otherwise provided in this Tariff. The Company may use the terms "intraLATA toll service" and "Regional Long Distance" ("Regional LD") interchangeably in other documentation presented to the Customer (e.g. individually negotiated contracts or invoices). The terms of this Tariff governing intraLATA toll service applies regardless of the term used. C

IntraLATA toll calling includes the following types of calls: direct dialed, collect, special toll billing, requests to notify of time and charges, person to person calling and other station to station calls.

4.1.2 Classes of Calls

Service is offered as two classes: station to station calling and person to person calling.

- A. Station to Station Service is that service where the person originating the call dials the telephone number desired or gives the Company operator the telephone number of the desired telephone station or system.
- B. Person to Person Service is that service where the person originating the call specifies to the Company operator a particular person to be reached, a particular mobile unit to be reached, or a particular station, department or office to be reached. The call remains a person to person call when, after the telephone, mobile telephone, or PBX system has been reached and while the connection remains established, the person originating the call requests or agrees to talk to any person other than the person specified, or to any other agreed upon alternate.

SECTION 4 - INTRALATA TOLL USAGE (cont'd)

4.2 Timing of Calls (con'td)

- 4.2.1 All intraLATA/regional long distance calls are billed in six second increments with a thirty second minimum. C
- 4.2.2 For station to station calls, call timing begins when a connection is established between the calling telephone and the called telephone station.
- 4.2.3 For person to person calls, call timing begins when connection is established between the calling person and the particular person, station or mobile unit specified or an agreed alternate.
- 4.2.4 Call timing ends when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.

4.3 Call Charges

Rates are based on the duration of the call as measured according to Section 4.2 above. In addition, where live or automated operator assistance is required for call completion or billing, a per call service applies.

Charges for all classes of calls may be to the calling station or to the called station when the called party agrees to accept the charges.
